DECISION SCIENCES Journal

VOLUME 20 TITLE INDEX

The Airline Discount Fare Allocation Problem. Phillip E. Pfeifer. (1): 149-157.

Ambiguous Criteria Weights in AHP: Consequences and Solutions. Bertram Schoner and William C. Wedley. (3): 462-475.

Application of the Net Present Value Criterion in Random and Flow Shop Scheduling. Gary D. Scudder and Dwight E. Smith-Daniels. (3): 602-622.

Assigning Students to Groups for Class Projects: An Exploratory Test of Two Methods. Thomas E. Muller. (3): 623-634.

A Bayesian Approach for Analyzing Results of Vehicle Collision Tests. James V. Carnahan and K. S. Krishnan. (4): 746-758.

Characterization of Unacceptable Solutions in LP Discriminant Analysis. Gary J. Koehler. (2): 239-257.

The Choice of Depreciation Method Under Uncertainty. Menachem Berg and Giora Moore. (4): 643-654.

A Clustering Algorithm for Computer-Assisted Process Organization. Jay E. Aronson and Gary Klein. (4): 730-745.

Combining Forecasts: Multiple Regression versus a Bayesian Approach. Daniel T. Walz and Diane B. Walz. (1): 77-89.

A Comparative Analysis of Master Production Scheduling Techniques for Assemble-To-Order Products. William J. Tallon. (3): 492-506.

A Comparative Analysis of the Relative Effectiveness of Four Dynamic Lot-Sizing Techniques on Return on Investment. Paul C. Jordan. (1): 134-141.

Comparison of the Effects of Specific and General Performance Standards on Performance Appraisal Decisions. Vandra L. Huber. (3): 545-557.

A Componential Segmentation Model with Optimal Product Design Features. Paul E. Green, Abba M. Krieger, and Robert N. Zelnio. (2): 221-238.

Computer Support for Strategic Decision-Making Processes: Review and Analysis. Rajiv Sabherwal and Varun Grover. (1): 54-76.

A Consistency Test for AHP Decision Makers. Eric F. Lane and William A. Verdini. (3): 575-590.

Cost and Shortage Trade-Offs in Aggregate Production Planning. Kalyan Singhal and Veena Adlakha. (1): 158-165.

Data Driven Modeling: An Application in Scheduling. Lori S. Franz. (2): 359-377.

Data Envelopment Analysis for Managerial Control and Diagnosis. Michael K. Epstein and John C. Henderson. (1): 90-119.

Decentralization in Linear Programming Models. C. van de Panne. (2): 304-319.

Decision Making, Scaling, and Number Crunching. Thomas L. Saaty. (2): 404-409.

Decision Models for Robot Selection: A Comparison of Ordinary Least Squares and Linear Goal Programming Methods. Mohammad M. Imany and Robert J. Schlesinger. (1): 40-53.

Determinants and Consequences of Perceived Complexity in Human-Computer Interaction. Dov Te'eni. (1): 166-181.

Efficient Heuristics for MRP Lot Sizing with Variable Production/Purchasing Costs. Eric L. Prentis and Basheer M. Khumawala. (3): 439-450.

An Empirical Test of Staw and Ross's Prescriptions for the Management of Escalation of Commitment Behavior in Organizations. Sidney L. Barton, Dennis Duchon, and Kenneth J. Dunegan. (3): 532-544.

Exploring Contrasting Formulations of Expectancy Theory. Douglas D. Baker, Ramarathnam Ravichandran, and Donna M. Randall. (1): 1-13.

Goal Programming Approach for Regression Median. Toshiyuki Sueyoshi and Yih-Long Chang. (4): 700-714.

The Impact of Alternative Vendor/Buyer Communication Structures on the Quality of Purchased Materials. Joseph R. Carter and Jeffrey G. Miller. (4): 759-776.

Impact of Information Systems (IS) Steering Committees on IS Planning. Yash P. Gupta and T. S. Raghunathan. (4): 777-793.

Inference in a Binary Response Model with Applications to Data Analysis. Nicholas Teebagy and Sangit Chatterjee. (2): 393-403.

An Instrument for Measuring the Critical Factors of Quality Management. Jayant V. Saraph, P. George Benson, and Roger G. Schroeder. (4): 810-829.

Integrating Analysis and Communication Skills into the Decision Science Curriculum. Lori S. Franz. (4): 830-843.

An Integrative, Experiential Approach to Production Management Education. R. Lawrence LaForge and Charles W. McNichols. (1): 198-207.

The Internal Validity of the Trade-Off Method of Conjoint Analysis. M. Hossein Safizadeh. (3): 451-461.

Inventory Control and Scheduling of Multiple Products in a Common Facility. P. S. Sundararaghavan and Mesbah U. Ahmed. (3): 476-491.

Joint Lot Sizing and Scheduling of Multiple Items with Sequence-Dependent Setup Costs. David M. Dilts and Kenneth D. Ramsing. (1): 120-133.

Linear and Nonlinear Valence Functions: A Behavioral Decision-Making Assessment. Ramarathnam Ravichandran, Douglas D. Baker, and Donna M. Randall. (4): 685-699.

Lowering Inventory Systems Costs by Using Regression-Derived Estimators of Demand Variability. Raymond A. Jacobs and Harvey M. Wagner. (3): 558-574.

Modeling Synergy and Learning under Multiple Advanced Manufacturing Technologies. Jack Meredith and Jeff Camm. (2): 258-271.

Network Models for Fleet Management. R. R. Vemuganti, M. Oblak, and A. Aggarwal. (1): 182-197.

On the Generality of the PERT Average Time Formula. Marvin D. Troutt. (2): 410-412.

On the Joint Lot-Sizing Problem with Zero Setup Costs. S. Selcuk Erenguc and H. Murat Mercan. (4): 669-676.

Optimal Cash Tender Offers. Jacques A. Schnabel and Ebrahim Roumi. (2): 272-284.

Optimal Cost Sampling for Decision Making with Multiple Regression Models. Mark Eakin, Lawrence L. Schkade, and Mary Whiteside. (1): 14-26.

Optimal Offer Strategies in Mergers and Acquisitions. Asim Roy. (3): 591-601.

Participative Budgeting and Managerial Performance. Peter Chalos and Susan Haka. (2): 334-347.

The Performance of MRP Purchase Lot-Size Procedures Under Actual Multiple Purchase Discount Conditions. Orinda Byrd Christoph and R. Lawrence LaForge. (2): 348-358.

The Representation and Impact of Information System Reliability on Cost Variance Decisions. Daniel E. O'Leary. (2): 378-392.

Risk-Constrained Information Choice. Ronald M. Marshall and Ram Narasimhan. (4): 677-684.

A Robust Multivariate Procedure for the Identification of Problem Savings and Loan Institutions. David E. Booth, Pervaiz Alam, Sharif N. Ahkam, and Barbara Osyk. (2): 320-333.

Shopping Model of the Time-Sensitive Consumer. U. N. Umesh, Kathy L. Pettit, and Carl S. Bozman. (4): 715-729.

A Simple Heuristic for Lot Sizing with Setup Times. William W. Trigeiro. (2): 294-303.

Solving the Classification Problem in Discriminant Analysis Via Linear and Nonlinear Programming Methods. Antonie Stam and Erich A. Joachimsthaler. (2): 285-293.

Solving the Economic Lot-Scheduling Problem Using the Method of Prime Subperiods. Patrick R. Philipoom, Loren Paul Rees, and Bernard W. Taylor, III. (4): 794-809.

Some Cautions on the Measurement of User Information Satisfaction. Dennis F. Galletta and Albert L. Lederer. (3): 419-438.

Some Empirical Findings on Short-Term Forecasting: Technique Complexity and Combinations. Nada R. Sanders and Larry P. Ritzman. (3): 635-640.

System Development Project Effectiveness: Problem-Solving Competence as a Moderator Variable. John R. Weitzel and George B. Graen. (3): 507-531.

A Test of the Cross-Sectional Robustness of the Arbitrage Pricing Model Using Foreign Exchange Rates. Carl B. McGowan, Jr. and Kishore Tandon. (1): 142-148.

A Theory of Production Competence. Gary Cleveland, Roger G. Schroeder, and John C. Anderson. (4): 655-668.

Unacceptable Solutions and the Hybrid Discriminant Model. Gary J. Koehler. (4): 844-848.

A Warning Zone Method for the Multiperiod Cost Variance Investigation Problem. David R. Finley and Woody M. Liao. (1): 27-39.
